

Description

NoSpot - as the name suggests you get a continuous and even light along the whole length. No diffuser or aluminium profile is required.

It's only 6mm wide, slim and compact making it perfect for embedding in a routed channel - it's flexibility means you can easily route it around curves for great creative effects.

We supply it to you as a complete unit, cut to length with end caps fitted and sealed and a generous 2m input cable. it's made from Silicon and is fully waterproof so can be used indoors or out.

It operates at 24V and a maximum of 16w per metre and if powered from one end the maximum single length is 10m, however if you want a longer length we can make this for you but you will need to provide power to both ends.

NoSpot can be installed using short aluminium clips or into longer 1m channels - it can also be inserted into routed channels if required.

Specifications

Operating Voltage	24v
Wattage	Max 12w
Colour Temperature	2700k
Dimensions	6mm x 12mm
Min. Bending Radius	40mm
